FACE \$50
FACE & DÉCOLLETAGE \$100

Microdermabrasion is a mini procedure that involves the skin being thoroughly polished to remove the top layer of the skin and dead skin cells.

It also promotes the production of new cells in the deepest layer of the skin. The procedure cleanses the pores thoroughly leaving a fresh glow on the skin. It also avoids any future breaks-outs if used on a regular basis. Microdermabrasion can also be used to improve sun-damaged skin, to lessen the appearance of scars and pigmentation and stimulate collagen formation to further even out skin tone, texture and appearance.
